How To Grow Sweet Peas

Sweet Peas require a rich cool soil to grow to perfection. First dig a trench 2 feet deep and 18 to 20 inches wide. Refill this trench to within 6 inches of the top with soil mixed with cow manure. When filling this last 6 inches mix **Goodes Special Sweet Pea food** with the soil at the rate of 1 pound to every three feet of trench. Soak thoroughly and allow to stand two or three days. Then cultivate lightly and sow the seed, covering one inch. When plants develop thin to 4 inches apart. One ounce of seed will plant 25 feet of row.
